

Glass Making

Learners at Catcote Futures have had the opportunity to create their own glass work!

The learners did their research, they looked at glassware that they may like to recreate and developed individual mood boards. They designed their own product and made this from paper prior to creating their final product in glass. Learners used a variety of techniques including fused glass using stringers and rods, adhering to Health and Safety at all times.

Learners have successfully made a wide selection of glass coasters (the remaining few can be purchased from Catcote Futures reception or Catcote Metro) and are now looking at making glass plaques carrying the theme of the Tall Ships.

Learners have also been tasked with a very important job...

...they are designing and making the trophies for Catcote Futures Awards night on the 30th June.

These will be staying under wraps until the event!
