

## We Are In Studio and Garage 29 Graphics

Today one of our sixth form and one of our STEPs students went for a visit to <https://www.facebook.com/weareinstudio>. This is the second time they have welcomed our students to show them the work that they carry out. They were shown by Beth and Helen how they design leaflets and websites and they talked about different coding.

They then went out with Karl so he could show them how they use the drone within the business. The students really enjoyed themselves, they got to fly the drone and take photos. A couple of the photos they took are on the post, and we are sure you will agree they are fantastic.

They were then kindly asked by Tom from <https://www.facebook.com/Garage29Graphics> if they wanted to see what they do. He showed them the different printing machines and materials that they use. He went through the processes from the design to print.

We would like to thank @weareinstudio and @garage29graphics for making time out of their busy day for our students.
