

We Are In Studio

Today two of our students from our STEPs programme, our pathway to independence and employment have been on a visit to @weareinstudio in Hartlepool. They design websites, rebranding, graphic design, hosting of websites and social media posts for companies to name but a few. They work with lots of small local businesses providing affordable websites for them as well as working with larger National companies.

The students worked with Beth and Helen today and were shown how they edit photos/videos and text on different software that they use. They talked about the work they do withing the company.

Both the students really enjoyed themselves and have come away saying that they have learnt so much and are going home to research things more.

Thank you to all the staff at @weareinstudio for making our students feel so welcome.
